

## **Counterbalance Forklift Training Port Coquitlam**

Counterbalance Forklift Training Port Coquitlam - Counterbalance Forklift Training courses are always in high demand. The Counterbalance forklift is a forklift which is designed together with a weight that counters the balance, evenly distributing the weight of the load across the arms of the forklift. Counterbalance forklifts are designed so the weight on the lift is counterbalanced by the weight behind the centre of gravity. The load is projected out from the equipment's front so it is visible to the operator of the forklift. This kind of forklift truck must only be utilized on stable, level ground or on a prepared surface.

Forklift drivers are needed to obtain training which will allow them to better know the right or proper method across the arms of the forklift. The trainee will be taught to correctly raise and lower the load vertically and how to tilt the lift truck mast, moving the mast between 5 and 15 degrees both forwards and backwards. Individuals training would learn the RTITB standards needed for safely operating the forklift. People training would also become familiar with the types of attachments for the arms of the forklift.

Kinds of Counterbalance Forklifts:

### **Walkie Pallet Trucks**

Walkie Pallet Truck is a counterbalance forklift suitable for getting into areas which are small and cramped. This lift is very maneuverable and capable of accessing virtually any tight space.

### **Walkie Stackers**

The Walkie Stacker differs from the Walkie Pallet truck mostly in terms of lift height. The Walkie Stacker can access tight places and has extra lift for high stacking capability. Neither of the Walkie line of lifts can be ridden. The driver has to walk behind them.

### **Rider Pallet Trucks**

The Rider Pallet Truck is designed so the driver can ride it. These riding lifts are great for dock unloading and loading.

### **Wave Work Assist Vehicle**

The counterbalance forklift known as the Wave Work Assist Vehicle can reach heights as much as 17 feet.

### **Sit Down Counter Balanced Trucks**

The Sit-down Counterbalance Forklift is built in three-wheel and four-wheel forklift designs. These durable and tough trucks are made to be ridden.
