

Clark Forklift

Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in commission in North America. Clark has five main lines of forklifts across the globe, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive designs of lift trucks, with parts covering more than 120,000 particular items for all of its automated equipment. Your local Clark Seller is your complete source for availability of all your components requirements supplied by Clark Totalift.

Clark features a exceptional Parts Distribution team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a really impressive intercontinental support network. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the material handling market.

Clark proudly remains an progressive leader of the industrial equipment industry, revolutionizing protection features such as the operator restraint system. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark has a unyielding goal to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production facilities. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Resource Efficient Production

Clark has preferred the very economical and advantageous structure of "Lean Production" for its assembly facilities and application of resources. This system was established to acknowledge the most efficient method of manufacturing facility management and ensuring maximum efficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engine Design

Clark's product engineers and suppliers join together to develop the proficiency and excellence of their merchandise while minimizing expenses. The contemporary value engineering agenda combines modern product growth and provides improved customer support and service within the industry.
